RAIN for the Sahel and the Sahara Learning and Earning Programs (LEGS)
The Learning & Earning Program (LEGS) trains and pays unlettered adult women to mentor girls to keep them in school and helps the mentors develop income generating activities of their choosing for 5 communities in the remote desert area of Agadez in northern Niger.

The $36,066 2-year grant pays for:

- Mentoring programs for five communities
- Stipends for mentors
- Practical skills workshops
- Savings & loan group activities
- Income generating activity start-up for mentor groups
- Training, monitoring and evaluation of programs including travel and food

“I alone cannot change the world, but I can cast a stone across the waters to create many ripples.”

Mother Theresa
Nomadic women in Niger have responsibility but few skills or opportunities for self-improvement or autonomy

- **Lack of education**
  The average Niger girl attends school for only three years.

- **Lack of knowledge of health, sanitation, and child bearing**
  1 out of 16 Niger women die in childbirth

- **Lack of opportunity**
  Due to displacement and drought-induced food crises in the northern Niger desert area, the nomadic people are forced to give up herds and learn to farm. Their poverty is severe.

- **Overwhelming responsibility with few resources**
  Many men have moved to towns to find work, leaving women behind to maintain the home and family with little or no income
The Program

Teach unlettered adult women to mentor school girls, teach them how to help themselves with an income generating enterprise, and provide them with self-help tools to succeed

- Five teams of 55 women and 180 girls for each community
  - 30 Mentors
  - 180 girls currently in school
  - 25 non-mentor women
- Form Savings & Loan group in each village to learn business basics
  - Begin S&L business training
  - Select and begin an income generating enterprise (e.g. herding) with a seed loan
- Learn mentoring skills, hygiene and social issues for mentors to share with their charges and the community
- Work with girls at school throughout the school year to support them and help them learn practical skills
DFW’s grant to RAIN is $36,066 over a two year period

Why we Love this Program

Because RAIN works with a unique nomadic community in one of the poorest countries in the world bringing new and innovative methods to empower women and girls.

- Innovative methods such as loans for seed money, gardening training, animal husbandry and artisan support are utilized to empower women and girls
- The mentor program allows unlettered women to mentor girls in school to teach the girls about hygiene and social issues (early marriage)
- Girls learn cooking skills and traditional artisan crafts
- Mentors earn an income that helps them put food on their family’s table

- The mentors become “wise women” in their communities, sources of information, and role models for girls and other women.
“As a RAIN artisan cooperative member, I’ve been learning new designs of items I already know, as well as how to make other items for the first time. It is thanks to this work that I am able to support my family’s needs. I’m gaining experience and earning a living doing what I love.”

-- Halima Atchani, Artisan

“With this [S&L] activity, I acquired a knitting machine with a value of $160, from which I will continue to profit.” Fourera Alassan, RAIN mentor
Voices of the People

The girls

“\textit{I’d like to become a doctor to treat the sick and chase some of the horrible illnesses from my village.}”

-- 16 year old Fatima Abdou
“Since RAIN introduced a mentoring program in 2009, our enrollment has increased from 65 to 233 students. I see the value of mentoring every day. The children come to school daily. We continue to see big changes – we now have 3 girls, the first ever from our school, who have gone on to middle school.”

-- Issafou Amadou,
Director Mari Primary School
“The sub-Saharan region is difficult to work in, tedious to live in, and it’s not inviting even to NGOs that want to reach out and help. It takes a stalwart person that has some tenacity and ability to get out there and stay out there. And I’ll tell you, the Tuareg recognize that. When Bess shows up, this is their sister.”

-- John Ahlgran, Chairman, RAIN Board of Directors
RAIN for the Sahel and Sahara was founded to help a neglected and desperately poor nomadic people provide education for their children.

- As a tourist, Bess Palmisciano saw the abject poverty of the Sahel and founded RAIN in 2001 when she could find no one to help the nomadic people.
- RAIN has patiently worked with the nomadic people who are not used to working together.
- They found common ground with education and the schools on which they could build a new community.
- Using schools as the common ground with the nomads, RAIN has helped communities create gardens, agriculture, find clean water sources, and move forward with better livelihoods.
Where they Work: The Sahel

The Sub-Saharan remote arid, desert region of West Africa where the nomadic people of the Tuareg and Wodaabe live.

- Niger is a desert country about the size of France, with French the official language
- One of the two poorest countries in the world according to 2012 UNDP Index
- Outside of the capital, roads are barely passable. There is no railroad, no port, and no natural resources on which to base an industrial economy.
- The Sahel is agricultural and nomadic, either tending herds or tending crops. Well over 95% of the people are totally dependent on the land.
- Because remote areas are so difficult to reach, few NGOs are willing to travel even if they wish to help the people.
Questions for Discussion

Care to share your thoughts?

1. How does a program that helps adult women to earn a better living help the girls they mentor, the school, and the community as a whole?

2. What are the benefits of the program requirement that mentors give 50% of their earnings to the school? Is it a fair requirement?

3. Why is it important for the program to be self-sustaining after the first two years?

4. We have seen other programs with strong, determined charismatic leaders. Could RAIN exist without Bess Palmisciano?
