June 2020 Featured Grantee
CureCervicalCancer

Kenya
Introducing CureCervicalCancer

CureCervicalCancer is dedicated to the early detection and prevention of cervical cancer around the globe for the women who need it most.
Where in the world?

Kenya

• 50 million people
• Double the size of Nevada
• 40% under age 15
• Population has grown since the 1990s due to high birth rate, declining mortality rate, unmet need for family planning, and early marriage and childbearing
• Literacy: 78%
• Life expectancy: 65 years
• Host country for many refugees
Where in the world?

Where in the world?
Life Challenges of the Women Served

• Cervical cancer is 100% curable, yet 300,000 women die from it every year -- 90% from resource poor countries
• Lack of access & awareness of screening and treatment
• Silent killer: when symptoms appear, it’s too late
• PAP smears not feasible due to cost and lack of infrastructure
About the Featured Grantee
CureCervicalCancer

• Offers “See & Treat” method of screening and treatment that’s fast, easy, and 85 to 90% effective.
• Provides training, supplies, clinics, and technical support.

• 114,630 screened since 2012; 7,709 treated
What are we supporting?

Expansion of current “See & Treat” program

- Training: 6 Master Trainers, 22 healthcare workers, 25 Community Health Volunteers
- 25,000 community members educated
- New thermocoagulation treatment devices
- 11 testing clinics and 1 mobile clinic
- Enhanced referral system
- Community Health Nurse to oversee program

Direct Impact: 12,160  Indirect Impact: 25,000
Budget

DFW’s grant of $48,660.69 will fund:

NOTE: During these unprecedented times of COVID-19, Dining for Women has adapted grant funding and offered flexibility to grantees in the timeline, budgets and execution of their projects. These adjustments will be reported in the grantee reports.

Share Your Thoughts

1. Why do you think it is important that men receive an education in cervical cancer screening?

2. What do you expect would be the profile of the Community Health Nurse?

3. How do you think this project might lead to preventative care in other areas of healthcare?
June’s Sustained Grantee: RIPPLE Africa

Changu Changu Moto Project (Malawi)

• Brings the CCM cook stove to 5,743 households in Nkhotakota and Mzimba Districts of Malawi.
• This simple, low-tech, fuel-efficient stove is constructed from mud bricks made from locally-sourced materials that are free and readily available.
• Women receiving the cookstoves are also trained in maintenance and upkeep. Since women are involved from beginning to end, it helps ensure a sense of pride and ownership of the stove and empowers them with the ability to maintain it.
• Direct Impact: 14,358 women and girls; Indirect Impact: 14,358 family members
